

International Guard Services

Residential Security Services

International Guard Services

Why you need us:

International Guard Services takes pride in being your gated residency guardians and ambassadors with guards who are clean cut, professional, and trained to recognize and report concerning situations.

IGS offers reliable and experienced security services at competitive rates throughout the State of Texas. We understand that when residents choose to live in a gated neighborhood, apartments, condos or high rise, security, safety, and privacy are of the utmost importance to them. While a gate acts as a valuable physical and psychological barrier for criminals, any gate is only as strong as its ability to limit access to criminals.

Customized security plan:

International Guard Services will design a customized security plan for your gated community or apartment complex that fully integrates security services with access control systems, alarms, perimeter fencing and surveillance.

We offer emergency, short-term guards and long-term uniformed guards who can either be armed or unarmed. Whenever possible, we encourage consistent placement of our guards so they can grow familiar with your residents and environment in order to build trust and make it easier to identify suspicious persons or activities. Additionally, when requested, we can account for an officer's location, activities, and movements while on duty using a security wand system.

Residential security services include:

- Alarm monitoring
- Emergency response
- Access control
- Lobby concierge services
- Video surveillance
- CPR/first aid
- Mobile vehicle/bike patrol
- Resident verification
- Guest registration
- Parking enforcement
- Lock-up and alarm
- Fire watch
- Crime and trespassing deterrence
- Daily activity logs
- 24-hour surveillance and guard service

International Guard Services

Trained for residential security:

IGS security guards are specifically trained to provide security for gated communities, homeowners associations and apartments, which means that they work to create a balance between friendly customer service and highly visible, effective security.

We are experts in surveillance, resident verification, guest registration, alarm monitoring and response, parking enforcement, periodic or random mobile patrols, lock up and alarm, fire watch and emergency response. Additionally, your guards can monitor any shared space such as a pool or clubhouse, closely follow post orders and provide daily reports to management about activities inside and outside of your gated community. All of our officers complete a rigorous security training program, receive ongoing instruction, pass thorough background checks and are screened for drugs and alcohol.

Where residential security can be used:

- Gated neighborhoods
- Apartment complexes
- Condos
- High rise apartments
